Dear Mr. Leone and Mr. Keeble,

On behalf of the Ritzville School District, I would like to take this opportunity to express the sincere appreciation for the outstanding leadership that Mr. Woody Sams provided as the project superintendent for the Ritzville School District's Capital Project this summer.

Given the magnitude of the project and the short timeframe to complete the project before the first day of school, Mr. Sams worked together with the school district personnel and helped make sure that the facility was substantially complete for the first day of school on August 27, 2003.

More impressive, was the personal dedication to making sure that the project was done right so that we, as the owners, were pleased with the finished product. Mr. Sams did a great job of communicating with everyone involved throughout the project. He treated everyone with respect. Our staff had nothing but good comments about his demeanor. He accommodated our needs throughout the project and we were impressed with his construction knowledge and expertise. He was a pleasure to work with!

He definitely earned an A+ as our project superintendent. We can't say enough good things about Mr. Woody Sams and if given the opportunity, we would love to work with him on another project.

Sincerely,

Mr. John D. Parker  
Ritzville School District Assistant Superintendent
