

CITY OF MOSCOW

April 14, 2004

TO WHOM IT MAY CONCERN:

In 1998 Leone & Keeble, Inc. of Spokane, Washington constructed a \$764,000 Wastewater Treatment Plant improvement for the City of Moscow. The project was an upgrade of the 'Headworks' and work consisted of one masonry block building, screening equipment, grit chamber, grit pump, demolition, mechanical, plumbing, structural concrete, electrical, grading and paving.

Leone & Keeble demonstrated quality workmanship on the project and completed the contract on schedule. They proved themselves as professionals and were very cooperative. Based on their Moscow performance Leone & Keeble are confidently recommended.

Feel free to call me at (208)883-7030 or email me at dweyen@ci.moscow.id.us if there are any questions.

Sincerely,

Dean C. Weyen
