Dear Paul,

Considering it is almost one year since the completion of our project and on behalf of the members of the Spokane Valley Seventh-day Adventist Church, we would like to thank you and Don Seely for a job well done. Your personal interest in the project has certainly been appreciated by all of us involved in getting this church built. The attention to detail, quality and cost has been evident in all aspects of your participation.

Our relationship was one of complete trust. Your honesty and integrity was all that we had hoped it would be and more. Don Seely ably managed the job and conducted himself as a Christian gentleman with kindness and concern for our needs and wants in the building. He handled the other contractors with fairness and firmness to meet their commitments and the total commitment to the job.

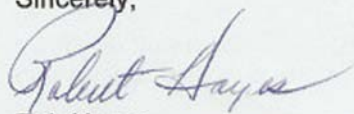

When we continue with the other additions to our overall plan we certainly plan to look to you as our number one choice as a contractor.

We would like to add that since the completion of the building you have been available at request and quickly taken care of any problems--which have been minor. This project like all others was not without problems, but you addressed them in turn minimizing their impact on our program. Changes were accepted without complaint and in most cases without major changes in the budget.

Last but a very important factor was your sensitivity to our budget problems. Completing the project considerably under budget was a tremendous boost to us in putting the finishing touches on the interior.

This has been an exciting time for this church and an important milestone has been reached. We are glad that you were part of it. Keep up the good work and we hope only the best for your continued success.

Sincerely,

Bob Hayes
Building Chairman

Charles Ferguson
Senior Pastor
