RE: Leone & Keeble, Inc

It was our pleasure to work with Leone & Keeble on a large construction project in Coeur d'Alene, Idaho. The project was a 100-bed recovery and training facility for women and children. Besides bedrooms, there were indoor and outdoor areas designed for childcare and training, a computer learning center, a chapel, an industrial kitchen with a large dining room, numerous classrooms, medical clinic, and various administrative offices. When completed, three buildings totaled 43,000 sq ft. placed on 3 acres with parking, garden, and several patios.

Our organization could not have been more pleased with the working relationship we enjoyed with Leone & Keeble staff members. They were very responsive to our needs, gave us great follow up on the un-foreseen details that always come up during a large project. Their communication was thorough; they made sure the sub-contractors did their work with excellence and chose their sub-contractors very well. They were transparent on costs and made decisions that were in our best interest. I appreciated the fact that we could complete a project with no big surprises.

We look forward to working with them in the future as we have other building projects in mind. Feel free to contact me if you need further information.

Sincerely,

Phil Altmeyer
Executive Director
