

To Whom It May Concern:

Numerica Credit Union, in April of 2008, completed a very extensive remodel of the old Safeco Building in the Spokane Valley for our new Headquarters Building. The contractor that we selected for the project was Leone and Keeble. From the first meeting to the completion of the project the organizational skills of Paul Keeble and his company were very much in play and clearly contributed a great deal to the successful completion of the project.

The project was extensive in that the entire electrical and mechanical systems were replaced with up to date systems as well as new ceilings and build outs for additional private offices. The project went extremely smooth with weekly meetings with all of the involved parties. There were no surprises either from a construction or a budget standpoint. In fact, the project was brought in on time and under budget.

I was very comfortable and confident in Leone and Keeble's company and the sub contractors that they brought to the project. Their supervision was excellent and no challenges went unsolved. I have worked with a number of contractors over the years on different branch offices we have constructed and I found Paul Keeble and company extremely knowledgeable, professional and organized. Our experience with Leone and Keeble was very positive and I would not hesitate to recommend them to anyone for any project.

Sincerely,

Dennis A. Cutter, President
Numerica Credit Union
