RE: Leone & Keeble, Inc. Recommendation

To whom it may concern:

I am pleased to write this letter on behalf of Leone & Keeble, Inc. I have worked on two projects over the last five years with this firm. One was a large middle school addition and modernization project in the Othello School District and the second was a new elementary school project in the White Pass School District. Both projects were performed using a General Contractor/Construction Manager (GC/CM) delivery method.

The Project Managers for Leone & Keeble on these projects were Brendan Monroe and Jeramie Keeble. I worked closely with these individuals, first during the pre-construction design phases and then through construction and project closeout. They exhibited a high degree of professional interaction with a variety of individuals in many different situations related to these construction projects. Those experiences have left me highly impressed with their knowledge, skills, and abilities.

Both projects were completed within their respective budgets and schedules. I found all of the Leone & Keeble staff assigned to the projects to be knowledgeable and team oriented. The partnerships that were formed between the district, architects, CSG staff and Leone & Keeble were directly responsible for the successful outcomes of the projects.

Sincerely,

Michael Currie
